ABOUT THE DATA

Clear definitions. Meaningful comparisons.

01

Monthly comparison

The main value is the comparison month. The difference and percentage use the baseline month, without adding estimates across months. Missing values are never zero.

02

Rankings and result types

Organic, image and AI results stay separate. An improvement requires two comparable positions; a lower position is better.

Dates and coverage

33 monthly summaries from January 2024 to September 2026. Details contain 471 observations: 53 month-end comparisons and 418 organic observations. URL variants are not merged without matching evidence.

Engagement start

The entered date filters this browser view and is not confirmation of the engagement date. A since-engagement comparison does not prove exclusive agency causation.
